Detroit DT12 Transmission Options

DT12 Remanufactured Transmissions

The Smart Choice for Your Customer—and Your Shop

When your customer needs a replacement transmission, a quality remanufactured unit delivers the performance and reliability they need without the cost of a new transmission. Professionally remanufactured transmissions are built using proven designs, thoroughly inspected and reconditioned, with critical wear components replaced to meet demanding service requirements.
Choose the cost-effective replacement option that can help reduce downtime, protect your customer's repair budget, and get their truck back to work quickly. It's a practical solution that delivers value, reliability, and confidence—mile after mile.
