

Capital Gear Remanufactured Allison Transmissions

To meet our customers' demand for top quality, we are revolutionizing the rebuilding industry by setting the standard with the quality of all our remanufactured units.

Features and Benefits of Capital Gear Allison Transmissions:

- All Transmissions and torque converters are completely torn down, for a complete 100 % inspection of all component parts.
- All parts are cleaned and inspected to assure factory specifications.
- All failed parts are replaced using NEW and Updated genuine Allison parts.
- All Technicians are Factory trained and maintain their status and knowledge through Allison E-Learn.
- Every transmission is load tested using electric dynometers. Full fourth generation testing capabilities to ensure complete compliance within factory standards. Oil used for testing purposes is Transynd Synthetic ATF.
- Programming and reprogramming to accommodate Dynax plates.

Available Models:

AT545
1000 SERIES
2000 SERIES
