

NoSpin Differentials

Eaton NoSpin is a speed sensitive automatic locking differential - powering both drive wheels, yet automatically permits wheel speed differentiation as needed.

NoSPIN is a proven performer for light, medium and heavy duty trucks, off-highway, agricultural, forestry, military and specialty equipment vehicles.

Benefits:

- Provides a fully locked rear axle that automatically unlocks when wheel speeds are mismatched
- Maximum traction relative to other rear wheel drive vehicles
- Maintenance free; requires no special lubrication or friction modifiers
- Uses original differential case, with easy installation
- Extremely strong and durable unit
- 100% automatic locking action - even with one wheel off the ground
- No individual wheel spin-out
- Legendary durability and proven performance in a wide variety of applications
